

# PIN BRAZING *BB2*

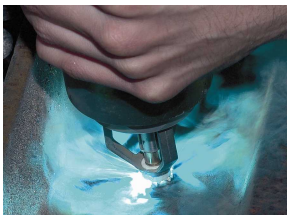

“DIGITAL CONTROL ON THE MOVE”

## BB2

The **BB2** is a machine suitable for larger maintenance or installation jobs. One person can easily carry the equipment and the **BB2** pin brazing process is electronic, therefore no pin fuse wire is required. The **BB2** is programmable via a switch on the control panel of the unit to allow for pin brazing under various conditions and materials. The capacity is approx. 50 brazes with the smallest type of brazing pin, and it can easily be increased by the battery charger mounted in a vehicle, the batteries being charged up during transportation between workplaces. When alternating between charging and brazing it is possible to increase the capacity by up to 5 times during a working day.

### Features:

- 50 Braze Capacity**  
 Which can be increased with recharging
- Control Panel**  
 Tells operator when to re-charge and braze settings can be adjusted.

- Quick Change Battery Pack**  
 36v stand alone units with integral cables, loading strap and quick-change connectors.
- Independent Battery Pack Charging**  
 With extra battery pack, operator can charge and braze at the same time.

BAC Corrosion Control Ltd has been assessed and certified as meeting the requirements of ISO 9001:2008, and only supply and endorse BAC Corrosion Control Ltd Pin Brazing products and consumables that are approved to that standard. If the use of non BAC Pin Brazing products and consumables is evident then warranties can be affected or even cancelled.
